

School districts recently received updated COVID-19 guidance from the CDC and NYS Department of Health and Education. The guidance provides increased flexibility regarding our operations, which should lead to a more normal school experience for our students with increased social engagement.

- Full time in-person learning for all students
- No social distancing requirement – classroom and cafeteria seating will provide students with more social interaction
- Face masks are optional for all students, staff and visitors inside schools and on school buses
- Continue with enhanced ventilation procedures to optimize air quality in all schools
- Regular cleaning and disinfecting of school buildings, buses and high-touch areas
- Promote hand hygiene and respiratory etiquette
- Every morning before school, please check your child for cold symptoms
- If your child displays symptoms, please keep them at home and call your school attendance line
- Masks are recommended upon return from isolation during days 6 through 10 after COVID-19 infection
- Close contacts do not need to quarantine and can continue attending school as long as they remain asymptomatic
- No surveillance testing for students or staff
- At-Home COVID Test Kits are available for free to all staff and families at each school
- Point of Care testing is available at all schools for students/staff who develop COVID-19 symptoms during the school day
